Package 'AmpAffyExample'

November 10, 2026

Version 1.52.0

Date 2009-07-22

Title Example of Amplified Data

Author Rafael A. Irizarry <rafa@ds.dfci.harvard.edu>

Maintainer Robert D Shear <rshear@ds.dfci.harvard.edu>

URL https://bioconductor.org/packages/AmpAffyExample

BugReports https://github.com/rafalab/AmpAffyExample/issues

Depends R (>= 2.4.0), affy (>= 1.23.4)

Suggests hgu133acdf

Description Six arrays. Three from amplified RNA, three from the typical procedure.

License LGPL (>= 2)

AmpData 2

Index **3**

AmpData *AffyBatch instance with six arrays from amplication experiment*

Description

This AffyBatch represents part of an expeirment to determine if one can use amplified RNA with Affymetrix GeneChip arrays.

Usage

```
data(AmpData)
```

Format

A AffyBatch containing 6 arrays.

Source

Anonymous for now...
